COLLOIDS AND SURFACES A

Subject Index

Adsorbent homogeneity, 95
Adsorption, 17, 95, 467
Adsorption barrier model, 243
Adsorption equilibrium constant, 117
Adsorption isotherm, 461
Adsorption isotherms, 141
Adsorption kinetics, 243, 283, 311, 429, 461
Adsorption parameters, 403
Adsorptive voltammetry, 89
Air–water interface, 221
Air interface, 233
Alcohols octadecanol, 503
Alkyl chain length, 69
Alkyl dimethyl phosphine oxides, 233
Alumina particles, 35
Analysis, 421
Analytical solution of the diffusion problem, 273
Anionic surfactant, 111
Antibody, 53
Antigen, 53
Atomic force microscopy, 1, 53, 491
Axisymmetric bubble-shape analysis technique, 301

Bidimensional miscibility, 477
Biocompatible surfactants, 413
Biological liquids, 441
Bis(quaternary ammonium bromide) surfactants, 69
Bubble pressure, 233
Bubble profile, 301
Bubbles, 429

Cationic surfactant monolayers, 251
Charged droplets, 355
Clouds, 355
CMC, 111
Colloidal interactions, 117
Conductivity, 59
Contact angle, drop shape, 197
Contact angle, dynamic, 197
Contact angle, polynomial fit, 197
Continuous surface deformation, 273
Correlation to pathologies, 441
Critical film thickness, 41
Critical micellar concentration, 89
Cysteine formation, 103
Cystine, 103

Detergent and protein stabilized foam, 395
Dielectric spectroscopy, 323
Differential absorbance, 111
Diffusion, 517
Diffusion-controlled adsorption, 273
Diffusion theory, 311
Dilatational, 211
Dilational liquid surfaces, 395
Dilational rheology, 517
Dilational viscoelasticity, 251
Discrimination functions, 421
Dispersed/flocculated size, 35
Dynamic surface elasticity, 167
Dynamic surface tension, 283, 371, 381, 503
Dynamic surface tensions, 441

Electrokinetic effects, 339
Electrolytes, 59
Ellipsometry, 41
Equilibrium surface potentials, 467
Equilibrium surface tension, 467
Expandable fluorine mica, 1
Extraction, 77

Fatty acids, 467
Film rupture, 41
Fingerprinting, 421
Finite element method, 117
Flavin adenine dinucleotide (FAD), 221
Foam, 429
Foam drainage, 395
Foam film, 429
Foams, 211
Foam stability, 403
Food proteins, 461

Fractal dimension, 95
Funnel method, 517

Gas volume effect, 381
Gelatine, 17
Generalized Sutherland equation, 273
Gouy–Chapman–Stern–Graham model, 1

Hemicyanine dyes, 111
HSA, 53
Human albumin, 461
Hydrophobic glass surfaces, 27
Hydrophobic interaction, 111

Industrial, 421
Interfacial reorientation, 311
Interfacial tension, 331
Ion exchange, 117
Ion expulsion, 77
Isotherms, 27, 95

Keratin, 103
Kinetics, 103

Lamella lifetime, 403
Lifetime, 429
Long chain alkyltrichlorosilanes, 491

Magnetic particles, 323
Marangoni dilational elasticity, 403
Maximum bubble pressure method, 381, 441
Metal ion, 77
Methyl stearate, 185
Micellar properties, 69
Micelle, 111
Micelles, 77
Micellization kinetics, 283
Micro-phase separation, 491
Microemulsion, 103
Microscopic emulsion films, 413
Mists, 355
Mixed films, 477
Mixed monolayers, 491
Mixed reverse micelles, 59
Molar surface area, 461
Monolayer rigidities, 261
Monolayer structure, 477
Monoolein, 477
Monostearin, 477
Motion, 429
Multianalyser, 421

n-Butanol, 429
Nanoemulsions, 413
Non-ionic surfactant, 517
Non-ionic surfactants, 311
Nucleation and growth, 185
Numerical solution, 311

Oscillating bubble tensiometer, 301
Overflowing cylinder, 395

Partition coefficient, 111
Percolation, 59
Perturbation analysis, 331
Polluting molecules, 355
Poly(ethylene glycol), 413
Poly(lactic acid), 413
Polymethyl methacrylate (PMMA) sphere, 1
Printed wiring board, 17
Probing, 53
Protein, 117
Protein adsorption, 221
Proteins, 141, 211
Pulsating bubble tensiometer, 371

Quality control, 421
Quantum statistical formulation, 331
Quasi-monodisperse micelles, 283

Rectangular microchannel flow, 339
Relaxation processes, 517
Rheology, 211

Safranine-O, 27
SDS, 111
Sedimentation, 323
Slurries, 35
Small-angle neutron scattering, 261
Sodium myristate, 371
Solubilization, 59, 111
Solvent, 59
Spindrifts, 355
Spread monolayers, 491
Spread protein films, 221
Stagnant surface behaviour, 395
Steric stabilisation, 413
Streaming potential measurements, 17
Substrate-induced coagulation, 17
Supersaturated monolayers, 185
Surface aggregation, 141
Surface area, 301
Surface coverage, 429
Surface elasticity, 273, 403
Surface film balance, 221
Surface force measurements, 1
Surface layer model, 243
Surface light scattering, 261

Surface reorientation, 141
Surface rheology, 251
Surface tensiometry, 441
Surface tension, 301, 371
Surface tension alcohol monolayers isotherms, 503
Surface tension, fluorocarbon, 197
Surface tension, from contact angle, 197
Surface tension hexadecanol, 503
Surface tension tetradecanol, 503
Surface viscoelasticity, 167
Surfactant, 429
Surfactant adsorption, 243
Surfactant geometry, 403
Surfactant monolayers, 261
Surfactants, 89, 141, 211
Surfactant solution, 167, 381

Tensiograph, 421
Thermodynamic parameters, 27
Thermodynamic theory, 141
Thin liquid films, 283
Thioglycolic acid, 103
Three-dimensional aggregates, 185
Transfer-controlled adsorption, 331

Ultrafiltration, 77
Ultrasonic attenuation spectroscopy, 35

Vibration effects, 301

Whiskey, 421

Xanthine oxidase, 221
